EDUCATION

KIET Group of Institutions

B.Tech | **CGPA: 8.0 / 10.0**

Nov 2022 – Jun 2026

Ghaziabad, India

COURSEWORK / SKILLS

- | | | | |
|--------------------------------|-------------------------------|-------------------------------|------------------------------|
| • Data Structures & Algorithms | • Network Security | • DevOps & CI/CD | • Full-Stack Web Development |
| • Operating Systems | • Database Management Systems | • Object-Oriented Programming | • Microservices Architecture |

PROJECTS

Bus Tech 🔗 | Java, Node.js, Next.js, TypeScript, Docker, RabbitMQ, Redis, Microservices **Dec 2024**

- Won **SIH 2024** — India's largest national hackathon — with an automated bus scheduling, route management, and duty-scheduling framework built for Delhi Transport Corporation (DTC).
- Implemented intelligent duty allocation and rotation for **drivers and conductors**, optimising shift balance, rest time, and resource utilisation across the entire fleet.
- Built a **self-hosted tile server** (Google Maps alternative) enabling real-time route visualisation and scheduling with zero third-party API dependencies.

Smart Load Balancer 🔗 | Node.js, TypeScript, Nginx, Docker, Redis, Microservices **Nov 2024**

- Engineered a high-performance, fault-tolerant **load balancer** supporting dynamic service discovery, request routing, and real-time traffic distribution across microservices.
- Implemented **Round Robin, Least Connections, and IP Hash algorithms** with adaptive health checks for automatic failover and zero-downtime deployments.
- Applied **kernel-level TCP tuning** and connection pooling to maximise throughput and reduce packet loss under high-concurrency workloads.

Pharmansh 🔗 | Node.js, Next.js, TypeScript, Docker, Azure, Cosmos DB, Nginx **Nov 2024**

- Architected performance optimisations sustaining **10,000+ concurrent users** during peak event periods with zero downtime, ensuring reliability and scalability.
- Delivered a complete **Warehouse Management System (WMS)** covering inbound-to-outbound medicine operations with automated **inventory tracking, stock adjustments, and real-time reconciliation**.
- Integrated intelligent reorder logic and batch tracking for **expiry management, supplier mapping, and demand forecasting** to minimise wastage and ensure consistent supply.

DecentraPay 🔗 | React.js, Vite, Solidity, Web3.js, Ethereum, JavaScript **Oct 2024**

- Built a **decentralised payment gateway** on the Ethereum blockchain using a custom **Solidity smart contract** with owner-gated transfer logic and comprehensive input validation.
- Integrated **Web3.js** with a React + Vite frontend to enable seamless wallet connection and on-chain ETH transfers with no centralised intermediary.
- Implemented contract-level safety guards — zero-address checks, balance validation, and **owner-only access control** — ensuring secure and tamper-resistant transaction execution.

Trello Clone 🔗 | Next.js, TypeScript, Appwrite, OpenAI API, Zustand, Tailwind CSS **Aug 2024**

- Built a full-featured Trello-style project management app with **drag-and-drop kanban boards**, real-time updates, and persistent storage via **Appwrite BaaS**.
- Integrated **OpenAI API** to generate AI-powered task summaries across boards, surfacing workload insights directly within the UI.
- Architected with **Zustand** for global state management, typed end-to-end with TypeScript, with a clean separation across app, store, and component layers.

POSITION OF RESPONSIBILITY

MetaUpSpace 

Feb 2025 – Present

Software Engineer | Remote, Uttar Pradesh

Mumbai, India

- Promoted from Trainee to full-time Software Engineer, taking ownership of core features in an **AI-powered web application** built with the MERN stack and Next.js.
- Performed **kernel-level performance tuning** — process scheduling, I/O handling, and container resource allocation — measurably improving application runtime efficiency under load.
- Led backend API development and frontend integration, shipping features consistently in a fast-paced **agile environment**.

MetaUpSpace 

Nov 2024 – Feb 2025

Trainee — Full Stack Developer | Remote, Uttar Pradesh

Mumbai, India

- Built and maintained scalable web application features using the **MERN stack** and Next.js, focusing on backend API development, frontend integration, and performance optimisation.

TECHNICAL SKILLS

- Languages: Java, C, TypeScript, JavaScript, SQL, NoSQL
- Infrastructure: Docker, Nginx, Linux, Redis, RabbitMQ, Microservices
- Frameworks: Node.js, Express.js, Next.js, React.js, Redux
- Cloud & DevOps: Azure, Cosmos DB, CI/CD, GitHub, GitLab, Jira
- AI / ML Tools: TensorFlow, PyTorch, OpenAI API, LangChain, Hugging Face Transformers
- Developer Tools: VS Code, GoLand, IntelliJ IDEA Ultimate, Postman, Thunder Client

CERTIFICATIONS

- ReactJS & Redux — Udemy
 - Java — Udemy
 - SQL — HackerRank
- Microsoft AI Classroom — Microsoft Learn
